AN AI ENGLISH TEACHER ON A VIDEO CALL

Speak English out loud. Build the habit.

Talk to Ellie, an AI teacher built by Studify, on a video call. Twenty-minute lessons on a written programme, where you do most of the talking. For adults who understand a fair amount of English and want it to turn into speech.

20 min
a lesson, mostly you talking

216
lessons written by hand

B1 to B2
in 12 parts

Every lesson
ends with a written report

How a lesson goes

1	**Recall**	Last lesson's language, used again
2	**New form**	Today's form goes up on the board
3	**Practice**	Board items you finish yourself
4	**Speaking task**	A real situation, played in roles
5	**Fix-ups**	Today's mistakes, one round each
6	**Wrap-up**	What moved, and what to practise next

The programme

General English, written lesson by lesson. 168 lessons teach, and 48 are checkpoints where the help stops and you hear what stuck.

B1
3 parts
tell a story, give advice

B1+
3 parts
pass on what others said

B2
6 parts
argue a case, negotiate, run a meeting

At the doctor's: it's been getting worse

The two-minute proposal

What carries over

- Only a mistake that blocks understanding is fixed on the spot. The ones you keep making are woven into exercises on new topics until they stop.
- Lessons come in pairs, and the second runs the same task with more of the language. What you learn comes back in the next lesson, a few lessons later and at a checkpoint.
- Pronunciation drills run on the lesson's own phrases, each aimed at one side of how English sounds, such as sentence stress or intonation. Every attempt gets an overall score plus accuracy, fluency, completeness and rhythm, and the sound that let you down is named.

A pronunciation drill. Every attempt gets a number and a word.

- After every lesson, a written report built only from what happened in it, with homework when something keeps slipping.

WHERE YOU START

A free assessment at studify.today

About fifteen minutes, where every turn asks a little more of you. You leave with your level and the part of the programme you start from.

Live since September 2026. Ellie is an AI teacher, software built by Studify. A browser and a microphone are enough, no camera needed.

UNDER THE HOOD

A real-time call on LiveKit with a Python voice agent. Deepgram for speech, OpenAI GPT in the conversation, Claude for lesson materials and reports. HeyGen LiveAvatar gives Ellie her face, Azure Speech scores pronunciation. Next.js on Vercel and Supabase underneath.
